 Canada

A data science professional with a background in software development skilled in programming, and predictive analytics.

I have honed my programming skills by working as a software developer for three years, and have enhanced my knowledge of predictive analytics by recently completing the [Master of Data Science](#) program at the University of British Columbia.

My interest lies in developing robust, scalable data pipelines, and using analytics to extract key insights from large datasets to solve real-life business problems. I excel at succinctly communicating these insights to broader, non-technical audiences.

## TECHNICAL SKILLS

<b>Software and Programming Languages</b>	Python (numpy,pandas, scikit-learn, keras), R (tidyverse, ggplot,forecast, Shiny)
<b>Machine Learning</b>	Classification, regression, clustering, feature engineering, hyper-parameter tuning
<b>DataBases</b>	Oracle, PostgreSQL, MS SQL, MySQL
<b>Statistical Methods</b>	Hypothesis testing, confidence intervals, survival analysis, principal component analysis and dimensionality reduction, Bayesian inference
<b>Cloud Services</b>	AWS (EC2, S3, EMR), Kubernetes , Docker
<b>Workflow Tools</b>	Agile, Jira, Team Foundation Server, GitHub, Trello, RStudio, Visual Studio

## EDUCATION

Aug 2017 - Jun 2018	<b>Master of Data Science</b> University of British Columbia, Vancouver, Canada
Aug 2009 - Aug 2013	<b>Bachelor of Engineering with First Class Honors - Software Engineering</b> University of Waikato, New Zealand

## EXPERIENCE

Apr 2018 Jun 2018	<b>Data Scientist (Industry Capstone Project)   <a href="#">Unbounce</a>, Vancouver, Canada</b> <b>Unbounce</b> provides an online platform that enables marketers or digital agencies to create, publish, and test landing pages, pop-ups or sticky bars to improve conversion rates. In a team of 4: <ul style="list-style-type: none"><li>&gt; Applied survival analysis methods and techniques to determine key factors in customer attrition.</li><li>&gt; Automated the data pipeline infrastructure to extract and transform data into usable components and integrous components.</li><li>&gt; Utilized easily decipherable visualizations to report findings to people with little statistical knowledge or non-technical background.</li></ul> <div><span>Python</span> <span>Pandas</span> <span>R</span> <span>Survival Analysis</span> <span>Trello</span> <span>Github</span></div>
May 2016 Dec 2016	<b>Data Analyst (Contract)  <a href="#">Brewbound.co.nz</a> , Auckland, New Zealand</b> <b>Brewbound</b> is an e-commerce startup providing fast online liquor delivery service in New Zealand. In a team of 2: <ul style="list-style-type: none"><li>&gt; Cleaned and wrangled data on a regular basis to generate meaningful datasets from marketing data.</li><li>&gt; Identified trends, patterns, and relationships in marketing data to provide answers to business questions, particularly regarding the effectiveness of various advertising channels.</li><li>&gt; Communicated findings to key decision makers to help facilitate the decision making process.</li></ul> <div><span>R</span> <span>Shiny</span> <span>MS SQL</span> <span>Trello</span> <span>Team Foundation Server</span></div>

Feb 2013 Sep 2016	<b>Software Developer   <a href="#">IMS Health</a> , Auckland, New Zealand</b> <b>IMS Health</b> (now IQVIA) is a leading global company providing clients in the healthcare industry with comprehensive solutions to measure and improve their performance. <ul style="list-style-type: none"><li>➤ Developed and updated functionalities for IMS Health's Nexxus Mobile Intelligence - a CRM solution, that helps drive customer engagement for life sciences industry using C#, JavaScript, XML.</li><li>➤ Performed maintenance and bug fixing on the existing code base to ensure production quality software.</li><li>➤ Participated in daily stand-ups and bi-weekly sprint meetings in an Agile setup and developed interpersonal skills.</li></ul> <div>C# Oracle XML JavaScript Angular.js Agile Jira</div>
Nov 2012 Feb 2013  Nov 2011 Feb 2012	<b>Intern   <a href="#">Orion Health</a> , Auckland, New Zealand</b> <b>Orion Health</b> is a global company whose clinical and integration products are used all over the world. In a team of 2: <ul style="list-style-type: none"><li>➤ Developed and integrated new custom defined Orion widgets as a proof of concept for Orion Health products using YUI - a JavaScript and CSS library.</li><li>➤ Designed and developed test cases using JavaScript for functionalities of Orion Health's Web software to ensure verification and validation, and make testing similar components easier for other testers.</li><li>➤ Automated the test cases using Sahi - a web automation testing tool.</li></ul> <div>HTML JavaScript CSS Sahi</div>

## + PROJECTS

Ongoing	<b><a href="#">Twitter Sentiment Analysis</a>   Personal Project.</b> A project to analyze tweets and classify them as either a positive or a negative sentiment. <ul style="list-style-type: none"><li>➤ Queried the Twitter API via Tweepy - a python library, to get the most recent tweets.</li><li>➤ Applied machine learning classification algorithms via the Natural Language Tool kit (NLTK) to classify the tweets as either positive or negative.</li></ul> <div>Python Pandas GitHub Tweepy Machine Learning</div>
Apr 2018	<b><a href="#">Social Standards and Salary Inclinations Study</a>   Study conducted as part of Masters course.</b> A hypothesis to determine whether a person's social standards is correlated with a person's drive for financial wealth. In a team of 3: <ul style="list-style-type: none"><li>➤ Created, and conducted a survey on SurveyMonkey collecting responses from over 100 participants.</li><li>➤ Cleaned and wrangled the data into a usable format, checking for anomalies, duplication, and missing values using R. Particular attention was paid to anonymizing personal identifiable information.</li><li>➤ Applied logistic regression to model the data. The study showed that there was not enough evidence to prove a correlation between person's social standards and drive for financial wealth .</li></ul> <div>R Statistical Modeling GitHub</div>
